DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Keough 5,042,667 in view of Rosenbaum et al. 5,249,687.

Keough '667 discloses a sequential mail sorting system for generating sort sequence codes for all mail pieces per claimed invention. The system reads a sort plan text file for a selected postal delivery zone, selects the carriers whose routes are located in such zone (figures 4 and 7), and determines the number of sort bins 101-120 available for the sorting system. The system also generates sort sequence codes for all of the mail pieces (holdouts and regular mails) for sequential sorting order. The sort sequence codes uses hash marks and look up table for zip code matching (figure 2b). However, Keough is silent as to the specific of placing the codes into a binary file.

Rosenbaum '687 discloses a sorting system for scanned mail. Rosenbaum teaches the usage of binary file for machine-readability purposes.

It would have been obvious for a person with ordinary skill in the art, at the time the invention was made, to have put Keough's sequence codes into binary file so that the sorting machine can read said codes, as taught by Rosenbaum.

Allowable Subject Matter

3. Claims 3, 4, 6, and, 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. Additional references made of record and not relied upon are considered to be of interest to applicant's disclosure: see attached USPTO form 892.
